

Marlborough International Management feeder funds

October 2015

Collas Crill acted in the establishment of four new Guernsey-domiciled feeder funds by Marlborough International Management, launched on 1 April 2014.

The new feeder funds are for UCITS vehicles operated by Marlborough Fund Managers and will provide offshore access to top-performing UK funds.

John Heap, a Director of Marlborough International Management, said: "The high level of interest in these funds, with their outstanding performance tracks records, is not confined to the UK and we are introducing the new feeder funds in response to clear demand from offshore investors."
